

About Us

This esteemed geoeconomics forum stands as a premier platform for transformative discussions, knowledge expansion, and the development of innovative frameworks and strategies focused on Value and Impact investments that are poised to reshape our world. By empowering investors, CXOs, entrepreneurs, fund managers, diplomats, policymakers etc., it equips them to adeptly navigate the dynamic landscape of social, geoeconomics and geopolitics and seize abundant opportunities with confidence.

Our Objectives

- ✓ Unleash the Principles and Strategic Tools of Geoeconomics to Conquer Global Markets
- ✓ Discover how to create social & environmental benefits alongside financial value.
- ✓ Identify the geopolitical risks, opportunities, and trends that influence investment decisions.
- ✓ Develop investment strategies that align with sustainable goals & the realities of geopolitics.
- ✓ Foster dialogue among investors, policymakers, and development teams.
- ✓ Engage in lobbying, build partnerships, and liaise with policymakers and industry leaders.
- ✓ Improvise the role of multilateral institutions in the digitally transformed multipolar world.
- ✓ Promote ethical considerations and responsible investing through the lens of geoeconomics.

The old investment maxim was to 'put all your eggs in one basket-and watch that basket'. The geoeconomic reality is that we're now just watching the eggs in someone else's basket. We better have the right tools, strategies, and mechanism not just to watch but to grow the portfolio.
